

After-School & Summer Programs

Our Knowledge Plus! after-school and summer programs enable students to continue learning even after the last bell rings. Our combination of experienced teachers, individualized attention, and low student to teacher ratios allows student to flourish.

Money Plus!

Our purpose is to help students learn about how to manage their personal finances in the real world. According to a Jump\$tart Coalition survey, 48% of high school students get a failing grade on personal finance knowledge. Our curriculum offers a range of topics from how to balance a checkbook to how financial markets work. We use real world applications to teach students about money and how it influences their everyday life decisions. Learning how to deal successfully with financial and economic challenges is essential for survival in the real world.
